### I Structures

Overall, the population in this region resides in structures that are highly vulnerable to earthquake shaking, though some resistant structures exist. The predominant vulnerable building types are mud wall and informal (metal, timber, GI etc.) construction.

## Historical Earthquakes

Date	Dist.	Mag.	Max	Shaking
(UTC)	(km)		MMI(#)	Deaths
2001-02-17	63	4.1	V(2,250k)	1
2001-05-08	62	5.7	VII(562k)	1
1976-02-04	226	7.5	IX(80k)	23k

Recent earthquakes in this area have caused secondary hazards such as landslides that might have contributed to losses.

## **Selected City Exposure**

from GeoNames.org

MMI	City	Population
V	La Libertad	17k
٧	Nuevo Cuscatlan	6k
٧	Rosario de Mora	5k
٧	Zaragoza	12k
٧	El Rosario	6k
٧	Olocuilta	6k
٧	San Salvador	526k
٧	Santa Tecla	125k
IV	Sonsonate	59k
IV	Santa Ana	177k
IV	Usulutan	52k

bold cities appear on map.

(k = x1000)

PAGER content is automatically generated, and only considers losses due to structural damage. Limitations of input data, shaking estimates, and loss models may add uncertainty.
